

Portable "Cut-in/parts" Single or double vehicle RV/Motor-home

- **Quality**—Freedom Prep Centers provide a cleaner air supply, providing a quality paint finish.
- **Versatility**—Freedom's variety of Prep Centers free up your Booths for larger jobs.
- **Savings**—Freedom's Preps do not exhaust, so there's no need for expensive heated replacement air or costly holes in your roof.

Introducing Freedom's newest FM2 Portable prep

- Ideal for spot repairs in open work areas.
- 5-filter system just like full size FREEDOM.
- 30 lbs. of activated charcoal for true VOC containment. More than any other similar product.
- Available with VOC monitor.

"Why buy a Freedom Prep/Paint Center?"

- Freedom Prep & Paint Centers are 100% American made.
- Freedom has the ability to Customize Preps to fit your specific needs such as truck, watercraft and manufacturing options. For spot repairs Freedom now offers the crossdraft PORTABLE model.
- Freedom has pit models and a "Semi down draft" with no pit required.
- Freedom's Activated Carbon Filters protect the environment and your employees.
- Freedom helps in reducing high shop utility bills by recycling filtered air (filtered 5 times).
- Freedom's true downdraft technology saves time, money, offers a cleaner finish and provides quality air in your shop.
- Freedom's filters are accessible and easy to change. Ceiling filters are on swing down holders. All filters, other than carbon, are VILEDON™ FILTERS.

• ONLY ACTIVATED CARBON FILTERS HELP PROTECT THE ENVIRONMENT.

"What is Activated Carbon?"

Activated carbon is a micro-porous form of carbon, manufactured from peat, wood, lignite or coal. The activation process develops a large number of microscopic crevices within the carbon, creating an enormous internal surface area— unmatched in its ability to capture and hold the vaporized solvents found in auto body paints and primers. Activated carbon is fully recyclable and has tremendous on-the-job life expectancy.
